CCRadio Solar - Battery Charging

The radios' Li-ion battery is shipped with a low charge. Please fully charge the battery before using the radio or placing into storage. When storing the radio it is recommended to recharge the Li-ion battery at least every six months. This keeps the battery healthy.

1. Before charging please remove the battery cover.
2. Remove the small plastic pull tab between the battery and the contact.
3. Make sure the battery is pushed down to make contact with the battery terminal.
4. Replace the battery cover.
5. Connect the Micro USB charging cable or the optional AC power adapter (sold separately) to the radios' charging jack under the flap.
6. Connect the USB end of the charging cable to a USB wall charger or a USB charging device. If using the optional AC power adapter, plug into an AC outlet. Charging can take 10-12 hours using the radio charging jack.
